CABINETS FOR THE MASTERPIECE

For those who are interested in really fine cabinets for the Masterpiece, six different styles are available, and a combination for phonograph and radio installation in the same cabinet.

These Masterpiece cabinets should not be compared to or confused with the radio cabinets found on competitive radio sets such as are turned out by the thousands. Each Masterpiece cabinet is designed by men who are authorities on period furniture, then hand built and finished by master craftsmen who have devoted their lives to the building of fine furniture, and whose work a hundred

years from today will be as much sought after and highly valued as is today the work of the famous furniture designers and builders of a century ago. Each and every Masterpiece cabinet has been specially co-related and matched to the receiver itself to provide the finest possible acoustic reproduction, a point usually completely overlooked in quantity production radios.

Only small illustrations appear herewith, but to those who are interested a booklet illustrating these cabinets in their full beauty is available for the asking at no cost.
